

SupraHealth

PHOSPHATIDYL SERINE

- Supports Memory and Brain Function
- Promotes Intercellular Communication*

60 VCaps®

A Dietary Supplement Vegetarian Formula

SUGGESTED USAGE: As a dietary supplement, take 1 Vcap® 1 to 3 times daily, preferably with food.

Our Phosphatidyl Serine is a phospholipid compound derived from soy lecithin that plays an essential role in cell membrane composition and intercellular communication. Phosphatidyl Serine is a major structural component of neural membranes where it assists in the conduction of electrical impulses and facilitates the activity of neurotransmitters involved in learning, memory, and mood. These properties make our Phosphatidyl Serine an ideal supplement for the support of cognitive function.
